

EagleSlat Industrial Fence

- Added sight obstruction in the most economical fence on the market - chain link - for commercial and industrial use.

- Minimized cost of maintenance

- Reduced labor costs in the field

EagleSlat fencing is available with galvanized or poly coated chain link in a variety of colors

“Out of Sight - Out of Mind” additional protection

The industrial slat used in *EagleSlat* for commercial applications are flat tubular in shape, 2.4” wide. Inside the tube there are three legs for extra durability. The slats are extruded with High Density Polyethylene (HDPE) with UV (ultra violet) inhibitors, specifically designed to protect it from the harmful effects of the sun and lengthen the life of the product. The fin-slat used in the *EagleMax* for greater privacy has the same construction and makeup but will offer a higher level of sight privacy.
